

AI RESEARCH WITH CHECKED EXECUTION

Finly turns AI research into a checked Alpaca paper order.

The model explains the market. Code fixes the risk, builds the order, and can still stop it.

Bruce Wen · Brandeis University

Trading agents break when one model researches, sizes, and sends.

COMMON AGENT

FINLY

Useful AI judgment—without unchecked account control.

Finly keeps exposure, option legs, broker fields, and execution permission in deterministic code.

Finly gives AI the judgment; deterministic code keeps the keys.

01 MODEL

Assess the evidence

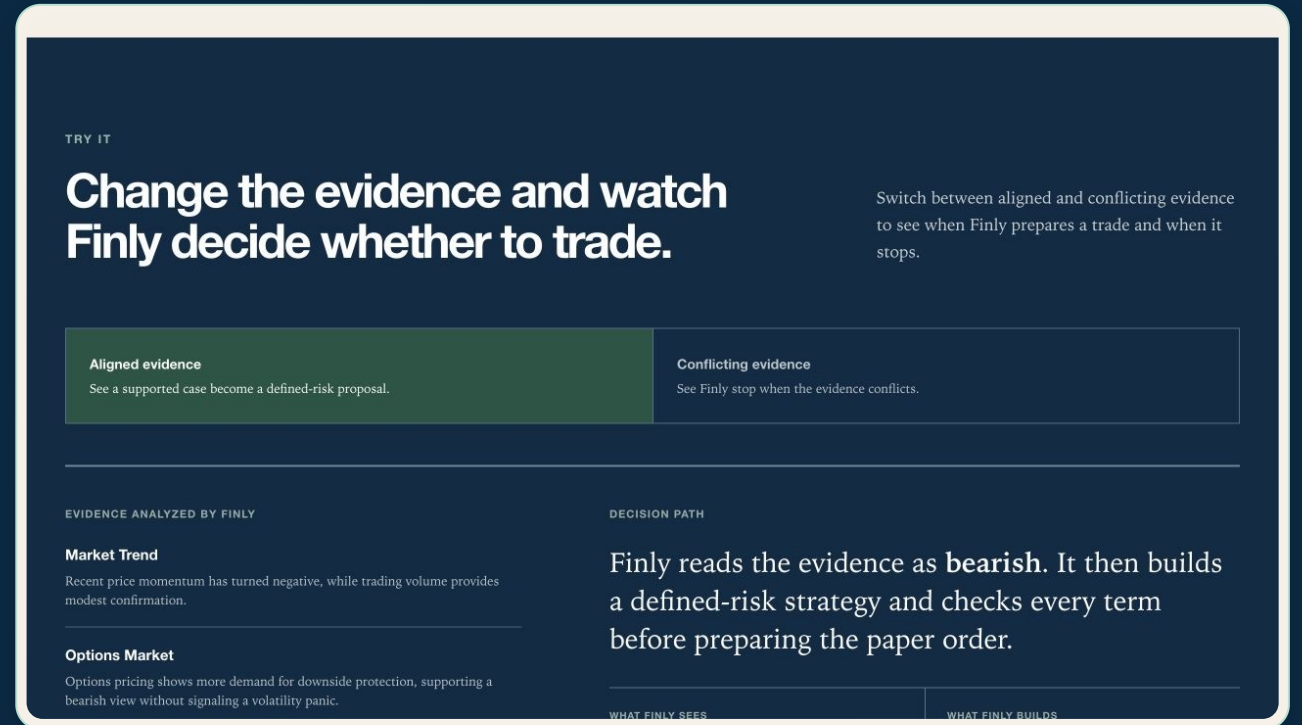

02 CODE

Aggregate, size, and build

03 GATE

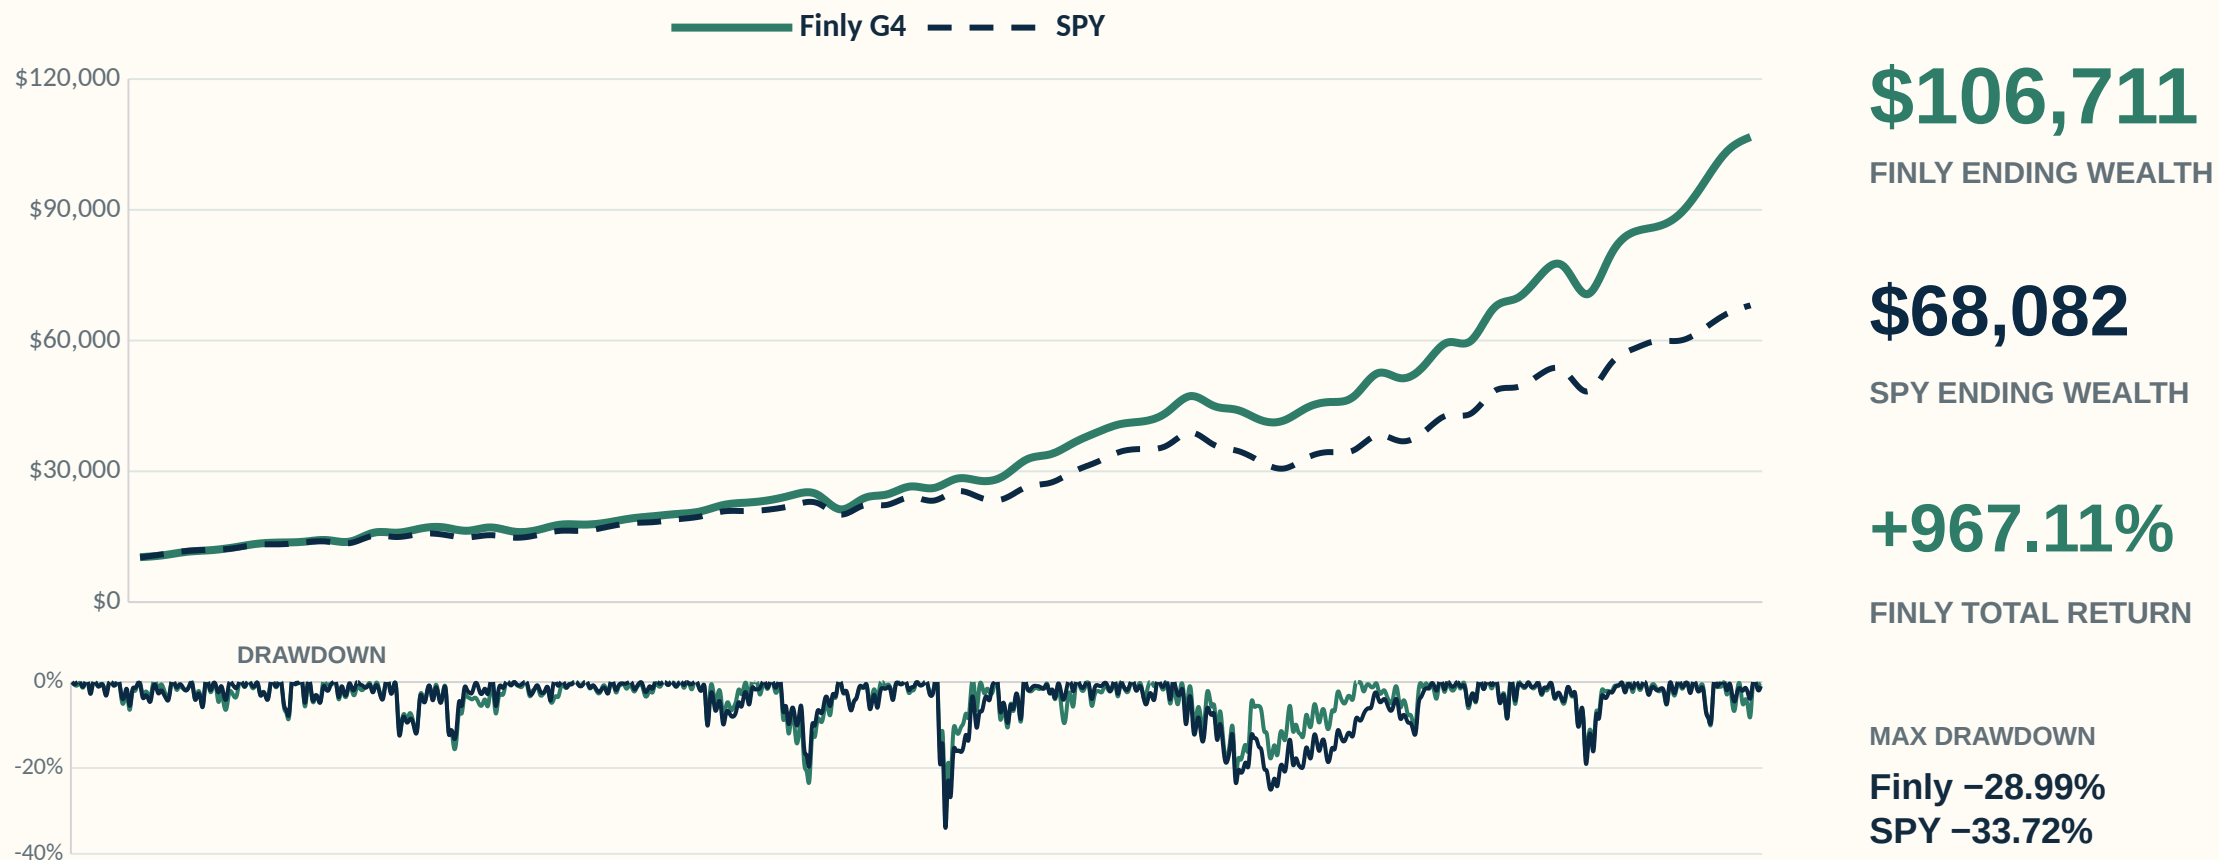

Send to Alpaca—or stop

The model may explain or veto. It never writes broker fields.

\$10,000 became \$106,711: \$38,629 ahead of SPY.

2013–2026 · identical starting capital · modeled 5 bp one-way costs

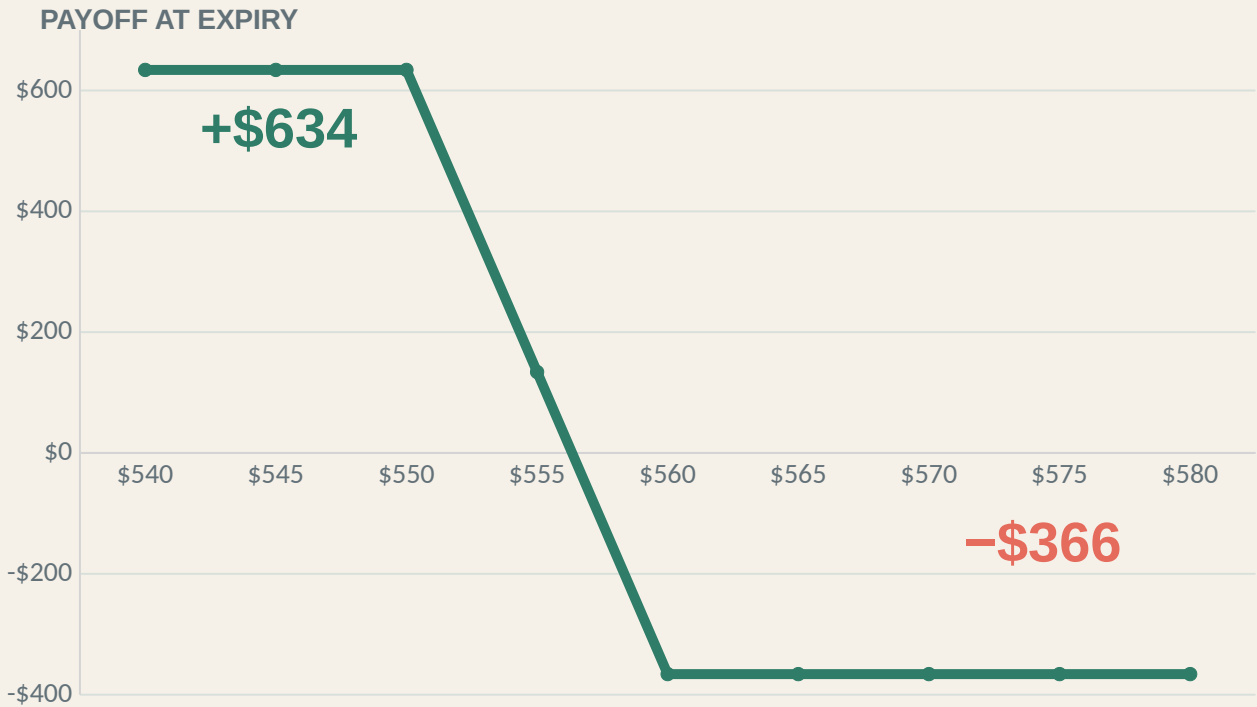

The edge survived 80 earlier years, 21 timing choices, and 5× higher costs.

Maximum drawdown was 16.31 percentage points shallower than the market proxy.

Every options proposal arrives with its worst case already fixed.

FINLY ADVANTAGE

+\$153.31

Same \$100k baseline · exact 4:00 p.m. ET ·
zero cashflows

One receipt, one baseline, one timestamp.

The public evidence file reconciles 15 broker fills and zero external cashflows.

Finly fails closed—and leaves a receipt.

TRY IT

Change the evidence and watch Finly decide whether to trade.

Switch between aligned and conflicting evidence to see when Finly prepares a trade and when it stops.

Aligned evidence
See a supported case become a defined-risk proposal.

Conflicting evidence
See Finly stop when the evidence conflicts.

EVIDENCE ANALYZED BY FINLY

Market Trend
Price momentum remains positive.

Options Market
Options pricing is mildly positive.

Economic Events

DECISION PATH

Finly initially reads the evidence as **neutral**, but the case falls apart under testing. Instead of forcing a trade, it keeps the account protected.

WHAT FINLY SEES

WHAT FINLY BUIDS

Conflict → NO TRADE → \$0 authorized loss

Judge the live system—not the slide deck.

\$153.31 ahead at the first close. Now challenge the decision and inspect the code.

- 01 **WATCH** Live \$100k account
- 02 **CHALLENGE** Aligned vs conflicting evidence
- 03 **INSPECT** Code, tests, and receipts

[SCAN TO OPEN FINLY](#)

Historical upside. First-close proof. Every decision inspectable.
